Simplex Castings Limited Undertakes ZED Certification Pledge, Strengthening Focus on Quality and Sustainability

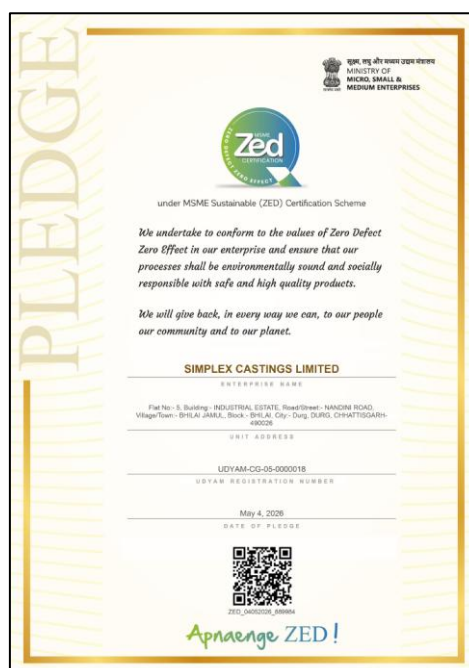

PRESS RELEASE

Bhilai, 5th May, 2026: Simplex Castings Limited (BSE: 513472), India's leading precision metallurgy and casting solutions company, has undertaken the pledge under the **MSME Sustainable (Zero Defect Zero Effect – ZED) Certification Scheme**, marking a clear step forward in its commitment to responsible manufacturing and consistent product quality.

The move reflects a broader shift within the Company to embed sustainability into everyday operations. By aligning with the **ZED framework**, Simplex aims to ensure that its manufacturing processes remain efficient, environmentally conscious, and aligned with evolving industry standards.

At its core, the ZED philosophy is straightforward: produce with precision and do so without compromising the environment. For Simplex Castings, this translates into a continued focus on process discipline, resource efficiency, and delivering products that meet stringent quality expectations.

The ZED Certification Scheme, introduced by the **Ministry of Micro, Small and Medium Enterprises (MSME)**, encourages companies to adopt cleaner technologies, reduce waste, and improve overall operational efficiency. For manufacturing businesses, it serves as both a benchmark and a roadmap toward sustainable growth.

Operating from its facility in Bhilai, the Company continues to build on its manufacturing strengths while adapting to the increasing importance of sustainability in industrial practices.

Speaking on this development, the management of Simplex Castings, said, *"This is a natural extension of how we think about our business. Quality and sustainability are not separate goals for us, they go hand in hand. The ZED framework helps formalize and strengthen that approach."*

About Simplex Castings Limited:

Simplex Castings Limited (SCL) is a leading Indian Precision Metallurgy company with global business presence. SCL possesses well equipped manufacturing facilities such as Cast Iron Foundry, and Heavy Engineering & Fabrication Plant. Each plant is associated with modern machining facilities and a central machine shop with several machine tools including a large number of CNCs, EPC Division to take up Turn-Key Projects, Design wing with modern computer setup and aided tools.
